

Tatiana Toro

WEB DEVELOPER

INDUSTRIAL ENGINEER

ABOUT ME

I am a dreamer, but I am also a doer. I believe that anything is possible if you have the courage to dream big, the determination to work hard, and the perseverance to never give up. I strive to learn and grow every day, and I am constantly training and developing my skills. I have clear goals in mind, and I am committed to achieving them. I know that I can achieve anything I set my mind to, as long as I never stop believing in myself.

My passion lies in web development, where I can unleash my creativity and utilize my technical skills to create exceptional, user-friendly products that deliver value to the end-user. I have a strong understanding in HTML, CSS, and JavaScript, and I have experience working with React. Additionally, I am proficient in Git and Linux, which helps me streamline my development process.

I am always looking for new challenges and opportunities to expand my skills, and I am not afraid to tackle complex projects. I believe that my determination, creativity, and technical skills make me an asset to any team.

PROFESSIONAL SKILLS

- Proficient in HTML5, CSS3, JavaScript.
- Familiarity with PHP and MySQL and Firebase
- React components and routing.
- Knowledge of responsive design principles and frameworks (Bootstrap)
- Experience with version control systems (Git)
- Strong problem-solving and analytical skills
- Excellent communication and teamwork skills.

EDUCATION

Associate of Science Degree

Present

Learning to learn is vital in the area of technology and thanks to the personal and group challenges that I have faced during my participation in San Diego Mesa College. I have managed to successfully develop different projects in web development.

Industrial Engineering

Universidad Nacional de Colombia / 2014-2018

PROJECTS

Pacha

Pacha is a fully functional ecommerce website that sells skin products. It uses HTML5, CSS3, and PHP to create a user-friendly experience for customers. Users can add them to their cart, and checkout with their payment information.

Netflix Clone

This project is a clone of the popular streaming service Netflix. It is built with React hooks, and it uses the TMDB API to fetch the movies and TV shows data.

Burger Queen

Burger Queen is a PWA designed for the orderly and efficient management of the workflow within a burger restaurant. Implemented with React Js, Sass, Firebase, Workbox. Lighthouse.

Leratto

Social Network that allows any user to create an access account and log in, to create, edit, delete and "like" publications. Learning focused on Javascript, database management, interaction with Firebase, promise consumption, modularization, asynchronous functions, and integration of Webpack.

NCP

Company website for a small business using HTML, CSS, JS, and Bootstrap. I used Bootstrap to create a responsive design that looks great on all devices. I also used JavaScript to add some interactive features to the website
